

ID3000 QUICKSTART GUIDE

Features:

- Messages prompt you through the weighing sequence for each animal
- The indicator learns the data entry sequence for fast data entry
- The indicator automatically maximises the viewable size of the weight display
- The back-lit display with light sensor allows the indicator to be used in low light conditions
- An on-screen help system provides on-the-spot assistance when you need it
- Printed reports can be created for files, statistics and weighing session data
- Up to 10,000 individual animal records can be stored
- The indicator stores 12 characters of data with each weight, together with two IDs
- Animals can be drafted/sorted into three separate ranges
- Average daily weight gain calculation

INSTALLING THE INDICATOR

- 1 Mount the indicator bracket on a flat surface, such as a timber rail or concrete structure, using screws or nails. Alternatively, mount the bracket onto horizontal pipework with the U-bolts supplied.
- 2 Connect the load sensor cables to the indicator. Connect the dust caps together to keep out dirt and moisture.
- 3 Connect the power cable (if using an external 12 V supply).

Installation tips:

- 1 Mount the indicator in a convenient place where animals cannot knock the indicator or chew the cables.
- 2 Mount the bracket firmly to prevent possible operator errors or fatigue.
- 3 Position the indicator so that the screen is out of the sun as much as possible.
- 4 When installing load sensors, refer to the documentation supplied with them.

FILES

Displays a list of files. Each file typically represents one weighing session.

LIFEDATA

Displays a list of all the IDs. More than one ID can be entered for an animal. IDs are cross-referenced, so that any ID can be entered in order to display animal information. Life data can be viewed and edited.

FILEDATA

Displays information recorded in the weighing session e.g. weights, measured data, drafting ranges, together with the ID. File data is linked to life data via the ID. File data can be viewed and edited.

STATS

Displays calculations for animals in the file e.g. average, total, minimum and maximum weights.

ZERO

Zeroes the scale manually. Used if dirt builds up on the platform. Zeroing is usually automatic.

To set your country settings for units, date format and spelling:

- 1 Press **ⓘ** to turn on the indicator. The Startup screen may appear depending on the setup of the indicator.
- 2 From the Startup screen, press **ESC** to start weighing or press **?** to access the on-screen tutorial.
- 3 After reading the tutorial, press **X✓**.
- 4 Select **SYSTEM**.
- 5 Scroll down to 'COUNTRY' and press **ENTER**.
- 6 Select your country from the list and press **ENTER**.

To start a file for a new weighing session:

- 1 Press **FILES** to go to the List of Files screen.
- 2 Select an empty file.
- 3 Press **ESC**. The file Start Date is entered automatically when the first weight is recorded.

To record an animal ID and weight:

- 1 Press **ZERO** to zero the scales, if required.
- 2 Move the animal onto the platform.
- 3 Enter an ID using the keypad. Press .
If the animal has not been weighed before, a dialogue box appears.
- 4 Select 'Create a new life data record'. Press .
- 5 Enter other data, if required.
- 6 Press  when ready to record the displayed weight.
- 7 Repeat for each new animal.

To view all recorded data from the weighing session:

Press **FILEDATA** to view weights and other data recorded in the weighing session.

To view statistics:

Press **STATS** to view a summary of numerical data, for example, average weight, maximum weight and the number of file data fields recorded in the file.

To enable an option in a setup screen:

- 1 Place the cursor on the option you want to enable or disable.
- 2 Press .
- 3 Select an option using the arrow keys.
- 4 Press .

Weighing Screen Setup FILE: 25

TIP

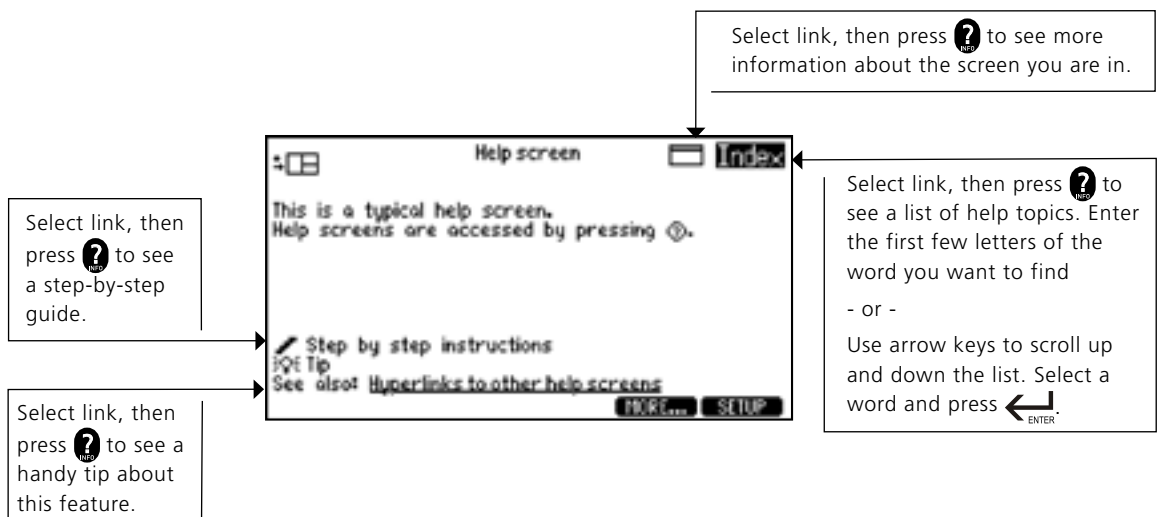

To quickly change **X** to **✓**, press 1.

To quickly change **✓** to **X**, press 0.

Find out about any field, screen or feature, using the on-screen help.

To view on-screen help:

- 1 Place the cursor on the field you want to find information about.
- 2 Press . A help screen is displayed about the field you are on.
- 3 If required, move the cursor to a link and press .

During weighing, make sure:

- The animal has four hooves on the platform.
 - Hands do not come into contact with the animal, or with part of the enclosure.
 - Another animal is not touching part of the enclosure.
 - The animal is not touching an unweighed part of the enclosure.
-
- The internal battery charger operates from the recommended Tru-Test power adaptor or a 12 V vehicle battery.
 - The indicator switches off automatically after 15 minutes of inactivity. Auto Power Off feature can be disabled by pressing , then . Press 0 to change X to ✓.
 - The indicator should be charged for 12 hours before it is used for the first time.
 - To view Battery Information including Charge (%) and Time to Run (hours and minutes), press ,  then .
 - A flat battery takes 8 hours to charge at temperatures of 10 to 35 °C (50 to 95 °F). For temperatures outside this range, charging time may be increased to 12 hours. In very extreme temperatures, the indicator may not change.
 - The indicator may be left on charge at all times and the scale can be used while charging.
-
- Make sure the underside of the crate or platform is free from dung, dirt and stones.
 - Store the load bars and the indicator in a clean, dry place, out of direct sunlight when not in use.
 - Charge the indicator before and after long-term storage, and every three months during storage.

Size	270 x 190 x 71 mm.
Weight	Battery option is 1.6 kg (3½ lb), non battery is 1.4 kg (3 lb).
Accuracy	± 1% or 2 resolutions (whichever is greater) when used with Tru-Test load sensors, minimum base resolution 0.5 kg (1 lb) normal, 0.1 kg (0.2 lb) fine.
Battery	Charging time = 8 hours in normal conditions; Run time = 15 hours continuous use minimum with two load cells (8 hours with back light on). Auto turn off is 15 minutes.
Power requirements	AC adaptor (regulated) or battery, using crocodile clip 11 to 16 V d.c., 400 mA.
Display	High contrast, wide temperature LCD module, 240 x 128 dots.
IP67 rating	The indicator is 100% water and dust proof. Rated for immersion in water to a depth of 1 m for 30 minutes.
Environmental	Operating temperature: -10 to +40 °C (+15 to +105 °F). Storage temperature: -20 to +35 °C (-5 to +95 °F).
Load bar capacity	Power for up to 8 (350 Ω) load bars or load cells. Enables weighing of large load.
Communication	2 x D9, one interface RS485 or RS232, the other RS232 only. Allows for connection to a printer and/or computer.

FCC Notice

This Tru-Test model ID3000 has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is used in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case users will be required to correct the interference at their own expense.
